

Hello!

I am Kyle Essenmacher

I am here because I am
passionate about adolescent risk
assessment & detection

Obtaining Adolescent Feedback

On P4C Modules

Why
is Kyle so passionate
about adolescent risk
assessment?

“

Original Project goal:

Evaluate the clinical use and effectiveness of the web based tobacco-use counseling tool - ACT TOB.

End Messaging
provide individualized
statistics to users.

Target demographic =
College aged student
smoking marijuana

All youth risk
assessment modules
require quantitative
data entry & none take
qualitative.

P4C Users

User Interviews

Assist Arynne in creating a Remote Youth Assessment Council

- Identify what communication channel(s) adolescents aged 9-18 use to chat with organizations they are a part of.
- Understand what information P4C wants to communicate with minors to help understand what communication tool should be used.
- Learn more about how adolescents aged 9-18 schedule events

P4C Users

****Adolescents are hard to reach
due to parental consent**

What is the purpose of a Remote Youth Assessment Council?

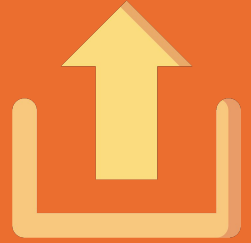

UX requirements

Asynchronous Text chat

Video Chat

Upload videos

UX requirements cont.

Available on all
devices

Meet 4x/year

9-15 members

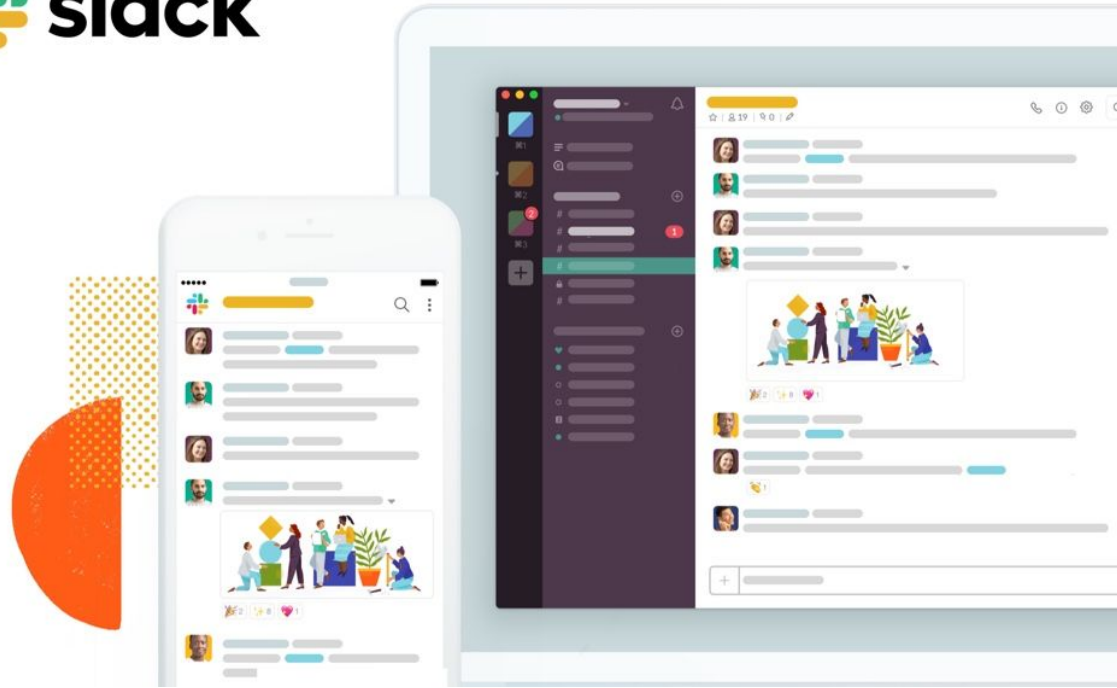

Options

	Slack	Discord	Website

Levels of YAC Engagement

Youth are involved throughout the entire organization. There is youth mentoring other youth & there are youth on councils representing the organization.

High level

Intrinsic

Mid-level

Motivation

Gather input from users

Low level

Extrinsic

Starting a YAC

- If funds are available having an in-person kick off meeting will increase youth engagement and commitment to one another
- Start out with a low-level of engagement & increase engagement level as resources become available
- If funds are available consider getting training from David P. Weikart Center for Youth Program Quality in Ypsilanti

Thanks

- ⦿ Scott + Arynne you helped a ton & I learned a lot
